**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 4, drawn to methods for manipulating a record list in which each record on the list may be individually selected, classified in class 707, subclass 101.
  - II. Claims 5-10, 14-18 are drawn to methods for presenting document records to a user through a display interface, classified in class 715, subclass 517.
  - III. Claims 11-13, drawn to a data file format, classified in class 707, subclass 100.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case,

Invention I has separate utility such as editing and categorizing a phone list.

Invention II has separate utility such as combining a caption with a photograph.

Invention III has separate utility such as creating a Document Type Definition (DTD) defining the tags for an XML document.

See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James H Blackwell whose telephone number is 703-305-0940. The examiner can normally be reached on Mon-Fri.
